AWS Infrastructure

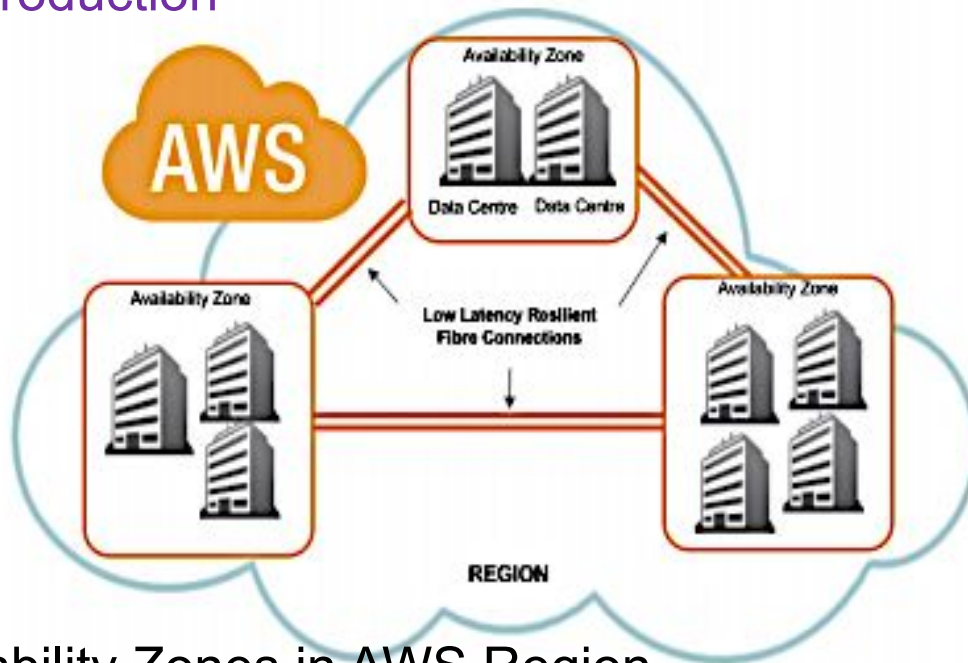

AWS Infrastructure

Introduction

AWS Infrastructure

Introduction

- Multiple Availability Zones in AWS Region
- Availability Zones consist of one or more discrete Data Centers

AWS Infrastructure

AWS Regions

36 Geographic Regions

N. Virginia, Ireland and Singapore are the regions with the most service-support in their continents. In the other regions, not all services of AWS are in progress

Current Regions

New Regions coming soon (Auckland, Taiwan, Kingdom of Saudi Arabia, and Germany.)

AWS Availability Zones

AWS Infrastructure

AWS Availability Zones

- An Availability Zone is a facility where the data centers are located.
- There are currently 114 Availability Zones (as of Feb 2025).
- All AZ's in an AWS region are interconnected with metro fiber.
- All traffic between AZ's is encrypted.
- AZ's are physically separated by a meaningful distance, many kilometers, from any other AZ, although all are within 100 km (60 miles of each other).

AWS Infrastructure

AWS Data Centers

- The data center infrastructure consists of **physical or hardware-based tools and components**.
- AWS data centers are **secure** by design.

AWS Infrastructure

AWS Local Zones

- AWS Local Zones are a new type of AWS infrastructure deployment that places AWS compute, storage, database, and other select services closer to large population, industry, and IT centers **where no AWS Region exists today.**
- Each AWS Local Zone location is an **extension of an AWS Region**
- There are 34 Local Zones currently

- The AWS free tier is a account type that lets you gain free, hands-on experience with AWS products and services.
- The AWS free tier provides customers the ability to explore and try out AWS services free of charge up to specified limits for each service.

AWS Free Tier

Free Tier Offer Types

The Free Tier is comprised of three different types of offerings;

- Services with a **12-month free tier** allow customers to use the product for free up to specified limits for one year from the date the account was created.
- Services with an **always free** offer allow customers to use the product for free up to specified limits as long as they are an aws customer.
- Services with a **short term trial** are free to use for a specified period of time or up to a one-time limit depending on the service selected.

AWS Free Tier

Billing Policy

- You are recommended to set a **billing alarm** to stay within the limits.
- If your application use exceeds the free tier limits, you simply pay standard, **pay-as-you-go service rates**.
